Working with Wind Power

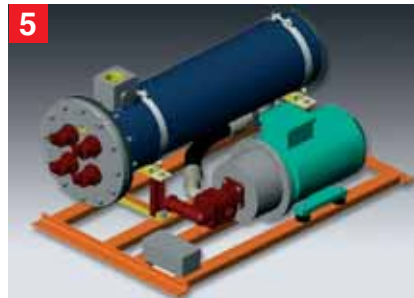

The success of the wind power industry with approximately 16,500 wind turbines and with a total capacity of over 16,500 MW in Germany alone underlines the industrial scale of this sector.

Economic efficiency and, with that, the technical availability of wind turbines is becoming increasingly important. As your professional partner, HYDAC Accessories is always available.

HYDAC Accessories offers its complete range for use on wind turbines.

Renewable energies require renewable mounting systems. No matter how or where cables are to be securely laid: we have the solution. Developed from the experience of our engineers. We welcome special customer requests.

Our flexible bell housings dampen even the loudest pumps to the level of a whisper.

1 Bell housings range

- Flexible bell housings
Nominal size: 200 to 660
- Rigid bell housings
Nominal size: 160 to 800
- Torsionally flexible couplings
DN 14 to DN 125
- Bell housing foot bracket
DN 200 to 660
- Damping rails

2 Component mounting

- Swivel bolt band clamps with PE supports or inserts for a clamping range of 44-506 mm
- Swivel bolt clamping band with or without insert
- Clamping bands: F1 quality
- Mounting supports and swivel bolt fasteners zinc-plated in A4

3 Series strips

- Standard series strips and series strips with individual specification up to a diameter of 58 mm.

4 Ball valve range in stainless steel

- Flanged ball valves DN 15-300
-50 °C to +350 °C
- DIN or ANSI flange
- Threaded ball valves from DN 04 to DN 50
PN 16 to PN 315

5 Oil heating for wind turbines

- Multi quick release swivel bolt band clamp for mounting the oil heater

6 Suction outlet ball valve

- Suction outlet ball valve for wind turbine transmission

7 Flexible bell housings

- Flexible bell housing for a filtration unit
