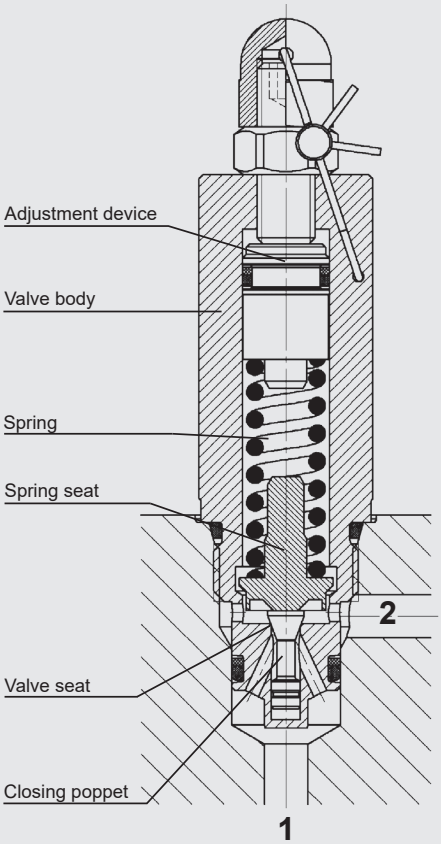
Poppet Type, Direct-Acting Cartridge Valve, Metric – 360 bar

FUNCTION



PRODUCT ADVANTAGES

- Low hysteresis and accurate pressure control
- Excellent stability throughout the entire flow range
- Various pressure ranges up to 360 bar
- External surfaces with advanced corrosion protection due to Zn-Ni coating (1,000 h salt spray test)

DESCRIPTION OF FUNCTION

The safety valve valve is rated on the basis of its opening characteristics in accordance with AD 2000 as a standard relief valve. The design corresponds to that of a direct-acting, spring-loaded relief valve.

With approval for the European market and the UK

- EU: in acc. with PED 2014/68/EU and type approval test in acc. with VdTÜV
- GB: in acc. with PE(S)R 2016

The compression spring exerts a force on the closing poppet and presses it on the valve seat. If the hydraulic pressure force is below the pre-set spring force, the valve is closed. Only if the hydraulic force exceeds the pre-set spring force does the valve open and flow is diverted to the tank via port 2. This continues until the pressure force drops below the spring force and the valve closes again.

Please make sure to observe the operating instructions in this regard, which are enclosed with the product on delivery.

The key points are stated below:

- No oil accumulation or pressure build-up permitted in the tank connection (port 2) (in acc. with DIN EN ISO 4126-1)
- If the terminal connections are incorrect, the safety function of the valve is disabled
- The pressure setting configured before delivery must not be altered
- Dismantling or modifying the valve is not permitted
- The system manufacturer's specifications must be adhered to when removing the valve from its installation space

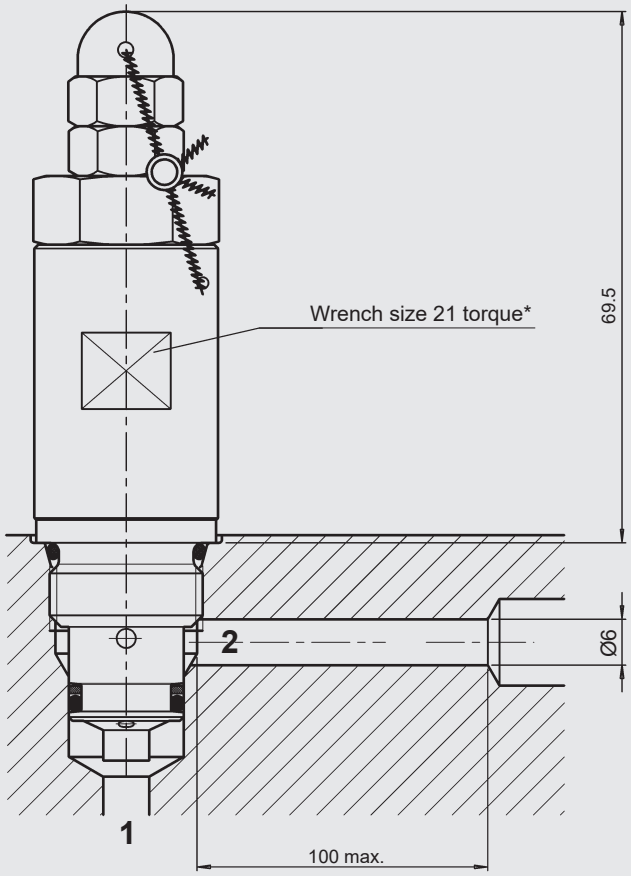
TECHNICAL DATA*

Operating pressure	Port 1: max. 360 bar Port 2: depressurised
Operating pressure range	80 to 360 bar
Flow rate	28 l/min (depending on pressure range – see table “Permitted flow rate”)
Temperature range of operating fluid	min. -20 °C to max. +80 °C
Ambient temperature range	min. -20 °C to max. +80 °C
Pressure fluid	Hydraulic oil to DIN 51524 Part 1, 2 and 3
Viscosity range	Min. 8 mm²/s to max. 350 mm²/s (see table “Permitted flow rate”)
Filtration:	Permitted operating fluid contamination level according to ISO 4406 Class 21/19/16 or better
Mounting position	No orientation restrictions
Materials	Valve body: Steel Piston: Hardened and ground steel Seal rings: FKM Support rings: PTFE
$MTTF_d$	Not applicable, assessment to PED already rated as Cat. IV
Cavity	06020
Weight	0.17 kg

PERMITTED FLOW RATE (at 350 mm²/s)

Range for cracking pressure [bar]	Max. flow rate [l/min]
80 - 89	20
90 - 100	13
101 - 110	20
111 - 115	12
116 - 140	15
141 - 160	18
161 - 180	22
181 - 200	24
201 - 210	28
211 - 240	18
241 - 260	20
261 - 340	11
341 - 360	16

DIMENSIONS



*Torque:
Steel housing (burst strength > 360 N/mm²): 35 Nm
Aluminium housing (burst strength > 330 N/mm²): 30 Nm
(With torque tool in acc. with DIN EN ISO 6789, tool type II, class A or B)

MODEL CODE

DB4E – 01 3 – CEXXXX.ENISO4126.4L. XXX. XXX

Designation
Relief valve

Design

Version number
Determined by manufacturer

Type approval code
XXX stands for the identification number of the notified body and CE to EN ISO 4126

Max. permitted flow rate
13 = 13 l/min
Rate depends on the pressure range (see table “Permitted flow rate”)

Cracking pressure
280 = 280 bar, cracking pressure, factory-set
(see table “Permitted flow rate”)

Notice: Cracking pressure setting available in 5 bar increments, e.g.: … 95; 100; 105; …

TYPE APPROVAL CODE (only valid for EU)

TÜV.SV.XX-733.4.F. XXX . XXX

Type approval code

Year of type approval test

Flow rate [l/min]
