

Digital Display Unit HDA 5500

## Description:

The digital display units in the HDA 5500 series are microprocessor-controlled display and monitoring units designed for control panel installation. Different versions are available with a maximum of three analogue inputs, an analogue output (adjustable 4 .. 20 mA or 0 .. 10 V ) and up to four relay outputs.
The analogue input signals are displayed according to the settings selected by the user. Each of the relay output can be assigned to one of the inputs or to the difference between input 1 and 2. A Pt100 temperature probe can be connected directly. In addition, an optional frequency measurement is possible, e.g. by using the HDS 1000 (HYDAC rpm probe) for the measurement of the rpm speed of rotary components.
Depending on the model, it is also possible to connect SMART sensors (Condition Monitoring sensors). SMART sensors are a generation of sensors from HYDAC which can provide a variety of different measured variables.

## Special features:

- Digital display of analogue signals
- Clear 4-digit, 7 -segment LED display
- Up to 3 analogue inputs ( 4 .. 20 mA ,

0 .. 10 V or 0 .. 5 V )

- Accuracy $\leq \pm 0.5 \%$
- Differential measurement possible
- Analogue output (4 .. 20 mA or 0 .. 10 V )
- Up to 4 relay switching outputs
- Supply voltage 12 .. 32 V DC or 85 .. 265 V AC $50 / 60 \mathrm{~Hz}$
- Optionally with Pt100 sensor input or frequency input

Technical data:

| Display range |  |
| :---: | :---: |
| Display | 4-digit 7-segment LED display field, red, height of digits 14.2 mm 3 LEDs for active sensor, 4 LEDs for active switching output |
| Display range | -999 .. 9999 (user-adjustable) |
| Display units with backlight | bar, kg/cm ${ }^{2}$, MPa, psi, ${ }^{\circ} \mathrm{C},{ }^{\circ} \mathrm{F}, \mathrm{mA}, \mathrm{V}, \mathrm{Hz}, \mathrm{kN}, \mathrm{m}$, mm , inch, $\mathrm{I}, \mathrm{l} / \mathrm{min}$, gal, gal/min, rpm, $\%$, t |
| Input data |  |
| Analogue signal input(s) |  |
| Measuring range(s) (up to 3 analogue inputs) | Selectable: 4 .. $20 \mathrm{~mA}, 0$.. $10 \mathrm{~V}, 0$.. 5 V or 4 .. 20 mA sequential (Modification 006) |
| Accuracy | $\leq \pm 0.5 \%$ at $25^{\circ} \mathrm{C}$ |
| Pt100 input |  |
| Measuring range | $-25 . .+100^{\circ} \mathrm{C}$ |
| Accuracy | $\leq \pm 0.5 \%$ at $25^{\circ} \mathrm{C}$ |
| Frequency/counter input |  |
| Signal threshold | 0 .. $0.6 \mathrm{~V}=\mathrm{LOW}, 3 . .24 \mathrm{~V}=\mathrm{HIGH}$ |
| Frequency range | 15 Hz to 4 kHz |
| Output data |  |
| Analogue output, permitted load resistance | 4 .. 20 mA load resist. $\leq 400 \Omega$ or $0 . .10 \mathrm{~V}$ load resist. $\geq 2 \mathrm{k} \Omega$ |
| Accuracy | $\leq \pm 0.5 \%$ at $25^{\circ} \mathrm{C}$ |
| Rise time | 70 ms |
| Switching outputs |  |
| Type | 2 or 4 relays each with separate common supply |
| Switching voltage | 0.1 .. 250 V AC, 12 .. 32 V DC |
| Switching current | $10 \mathrm{~mA} . .2$ A |
| Switching capacity | $500 \mathrm{VA}, 64 \mathrm{~W}$ |
| Life expectancy of switch contacts | $\geq 20$ million at minimum load <br> $\geq 400,000$ at maximum load (typical) |
| Reaction time | Approx. 20 ms (with switching delay $=0 \mathrm{~ms}$ ) |
| Setting range of switch points | 1.5 .. $100 \%$ of the pre-set display range |
| Setting range of the switching hystereses (switch-back points) | 0.5 .. $99 \%$ of the pre-set display range |
| Environmental conditions |  |
| Nominal temperature range | $0 . .+50{ }^{\circ} \mathrm{C}$ |
| Operating temperature range | $0 . .+50^{\circ} \mathrm{C}$ |
| Storage temperature range | $-40 . .+80^{\circ} \mathrm{C}$ |
| ( ¢ mark | EN 61000-6-1 / 2 / 3 / 4 |
| Other data |  |
| Housing | Control panel housing $96 \times 48 \times 109 \mathrm{~mm}$; control panel cut-out $92(+0.8) \times 45(+0.6) \mathrm{mm}$; front panel thickness 1.25 .. 15 mm ; maximum installation depth 121 mm |
| Supply voltage | 12 .. 32 V DC or 85 .. 265 V AC $50 / 60 \mathrm{~Hz}$ |
| Power consumption | 15 VA at 85 .. 230 V AC - fuse protection 1 AT |
| Supply for measurement transmitters | 12 V DC $\pm 1 \%$; max. $20 \mathrm{~mA} /$ analogue input |
| Residual ripple of supply voltage | $\leq 5$ \% |
| Weight | approx. 320 g |
| Note: Reverse polarity protection of the supply voltage, overvoltage, override and short circuit protection are provided. |  |

## Input models:

## Output models:

Connection terminals:
Supply voltage:
Plug-in terminal block 2 pole, RM 5.08 (cross section max. $2.5 \mathrm{~mm}^{2}$ )
Inputs/outputs:
Plug-in terminal block 11 pole, RM 3.5
(cross section max. $1.5 \mathrm{~mm}^{2}$ )
Relay switching outputs:
Plug-in terminal block 5 pole, RM 5.08
(cross section max. $2.5 \mathrm{~mm}^{2}$ )

## Dimensions:

Panel cut-out

## Model code:

HDA $5500-\underline{X}-\underline{X}-\underline{X X}-\underline{00 X}$

## Inputs

0 = one analogue input
1 = three analogue inputs
2 = one analogue input + frequency
input/counter function
3 = one analogue + Pt100 input

## Outputs

$0=1$ analogue output
1 = 1 analogue output +2 relay switching outputs
$2=1$ analogue output +4 relay switching outputs

## Supply voltage

AC $=85$.. 265 V AC
$D C=12 . .32 \mathrm{~V} D C$

## Modification

## 000 = standard

$006=$ version with sequential analogue output for HLB 1400 and CS 1000 (only with input model " 0 " and output model " 2 ")

## Note:

The information in this brochure relates to the operating conditions and applications described.
For applications or operating conditions not described, please contact the relevant technical department.
Subject to technical modifications.
