

Portable Measuring Instrument HMG 510

Two-line LCD display
Two sensors can be connected
(incl. HYDAC SMART sensors)
Automatic sensor recognition

Description:

The HMG 510 is a portable instrument for simple measurement tasks on hydraulic and pneumatic systems in mobile and industrial applications.

Thanks to its compactness and ease of handling, the HMG 510 is an ideal companion for employees in maintenance, commissioning and service.

Up to two sensors with HYDAC Sensor Interface (HSI) can be connected. Sensors are available to measure pressure, temperature and flow rate as well as sensors for condition monitoring (also known as SMART sensors).

Some examples of SMART sensors are the HYDACLAB® Oil Condition Sensor, the AS 1000 AquaSensor and the CS 1000 Contamination Sensor.

The HMG 510 automatically recognises these sensors and takes all of the necessary basic settings from each sensor. The measurement values and the corresponding physical unit are displayed on an easy-to-read LCD display.

In addition to this, the HMG 510 enables measured values which have been saved in the SMART sensors to be uploaded to a PC. With the aid of the HYDAC PC software "CMWIN", the measured data stored in the SMART sensors can be displayed on a PC screen in the form of a graph, then analysed, edited, processed and saved. The HMG has a standard integrated USB port to enable this data transfer.

To further extend the application range, the HMG 510 has a function for setting mechanical pressure and temperature switches precisely and reliably.

Special features:

- Hand-held 2-channel portable measuring instrument
- Simple and user-friendly key operation
- Large LCD display including battery status indication
- 2 sensor inputs, automatic sensor recognition
- Specially designed to display measured values from Condition Monitoring sensors (SMART sensors).
- USB port
