

## Quality Policy Statement

HYDAC Technology UK Limited is committed to the continual improvement of our products and services. This commitment is achieved through the effectiveness of our quality management system, ensuring that HYDAC Technology UK Limited strives to achieve optimum quality, reliability, service and efficiency through Total Quality approach and strategic direction.

- Total Quality Involves all members of the Company
- Total Quality Involves all aspects of the Company

The company aims to continually develop a process approach and risk based thinking to support Total Quality which embraces ALL activities within the company. The Managing Director, Management and Staff are responsible for maintaining Quality Assurance through the Quality Management System and seeking improvement by constant reviews conducted internally and with the relevant stakeholders, external providers and our customers to gain feedback of customer satisfaction and performance in the market place.

Management shall set quality objectives based on business risk, customer requirements and in accordance with current regulations and standards. These quality objectives are reviewed in management meetings to ensure Business processes are efficient and effective.

The monitoring and measurement of our processes use such Business Management Tools as internal auditing, Customer audits, certification companies to verify conformance to the latest Quality and product standards, this is reviewed by the Management Team and clearly communicated to the company to ensure awareness of business performance and empowers Management and team members to drive improvement within their processes.

To ensure continuity of products and services to the required standards, the company have developed, documented and implemented our Quality Management System and its processes to conform to the requirements of ISO.
